ABOUT ME

Hi! I'm Sakib Rahman, I'm studying computer science, and I really love it! I'm a hard-working, passionate person who believes in the importance of education and accessibility to technological advancements.

My computer experience started early. My parents had already taught me how to use the internet by the time I was old enough to understand it. My dad is a teacher, so he encouraged me to pursue computer science as my career path from a young age.I've been involved in many different projects at college. I'm interested in learning more about how computers work and also interested in all kind of programming language like C, c++, JavaScript, java and Python.
